Joe Lang - Enterprise GTM Builder / Trailblazer

Washoe Valley, NV | [linkedin.com/in/joemlang](https://www.linkedin.com/in/joemlang) | 518-221-8425 | josephlang@gmail.com

Enterprise IC who thrives in the details—connecting technical use cases to business value, and driving long-term revenue partnerships at some of the world's most iconic brands.

Builder & GTM Culture setter:

- ↳ Core contributor in scaling Harness from **~\$5M → \$200M+ ARR**. (93% - 187% achievement range over 5.5 years)
 - ↳ Top 3 all time grossing reps @ Harness, likely #1 grossing new logo rep
- ↳ Perfecto growth from **~\$10m to \$50m... (~\$200m acquisition)**
- ↳ Part of first sales hires (3) for new vertical @ Experian "QAS" group - (Gov, Utilities, Telecom) - *consistently ranked in top performing "QAS BU" teams (to this day)*
 - ↳ #1 grossing rep for Experian QAS @ time of departure
- ↳ Career totals: \$75M+ in contracted ARR

Enterprise Execution:

- ↳ Known for landing, expanding, and running strategic deals at Apple, Disney, Experian, Capital Group, and more
- ↳ Proven ability to create high-velocity revenue cycles from complex technical environments
- ↳ Trusted to lead "need to "go-win" strategic pursuits, MSAs and expansion opportunities

Joe Lang - Enterprise GTM Builder / Trailblazer

Washoe Valley, NV | [linkedin.com/in/joemlang](https://www.linkedin.com/in/joemlang) | 518-221-8425 | josephlang@gmail.com

- ✓ Culture creator | pursuing “excellence”
 - “Let’s disagree, argue the data, evidence, facts, feelings, options → commit & plan → rapidly iterate → drive progress → client goals
 - ↳ revenue → repeat
- ✓ Multi - threaded awareness & champion builder (IC to Exec levels)

Matt Schillerstrom · 1st

Let's talk product!

May 16, 2025, Matt worked with Joe but on different teams

Joe is a top seller and customer champion. He consistently brought in big, strategic wins and helped land some of the most recognizable names in our customer base. Beyond the deals, Joe is a strong customer advocate who truly listens and brings back clear, actionable feedback that helps improve the product. He deeply understands what enterprise buyers need and pushes for the right outcomes to drive growth and adoption.

Euri Alexander Ayala · 1st

Senior Software Engineer at Netflix

February 16, 2015, Euri Alexander worked with Joe on the same team

Joe is one of the most driven, talented individuals I have worked with. He has the ability to keep clear line of sight for exactly what he wants to accomplish for a client meeting, a task, or a whole project amid all of the bustle and activity around him.

Joe,

Thank you!

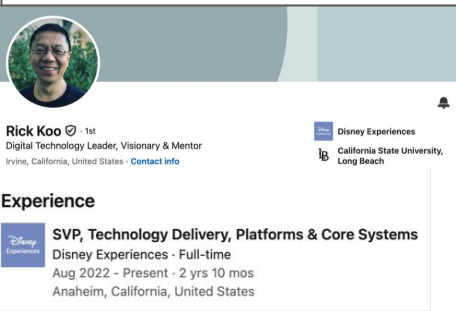

It is good to see the positive feedback you are getting from your major clients of our feature request. I have been socializing it with my team, and they, too, feel this will further enabling flexibility and extendibility of the pipelines we create.

We love these wins when we have a great partner such as Harness that listens to their customers and co-creating a win-win solution.

Thank you and the Harness engineering for leaning in.

I am looping in Gail as she and I have the same vision and passion to grow technology around us to advance Disney technology capabilities with our strategic partners.

Exceptional Partnership

Partnership Operating Rhythm

- Disney Experiences has the full support of the Harness ecosystem
- Harness investing additional senior resources in key regions to drive more in-person engagements
 - Our most successful partnerships thrive more when there is regular planned and spontaneous in person engagement
 - Structure and rhythm to enable cross-Pollination across large geo-dispersed engineer teams
- Maturing into a **Tech Excellence program**, w/ activities like:
 - establishing regular cadence for on-site Developer/App team workshops
 - Gamify Developer enablement
 - Sponsored Hackathons
 - Lunch n Learns
 - Product and Engineering roadmap idea workshops
 - All of the Harness SWAG

600:1 pipeline reusability ratio
2 golden templates, reused 1,200 times,
15 golden templates in total cover 95% of all pipelines

3.5 Builds Per Day / Per Dev
Fuel for Innovation & Guest Experience velocity

Activity past 90 days as of Jan 2025

Tech Excellence

Developer Productivity & Effectiveness

Platform Approach & Engineering Simplicity via Process & Tooling unification

Increase Tech Innovation & Reduce Costs

Enhance 'Developer Experience'

w/ focus on:

- unification & evolution of software delivery capabilities, procedure, & process
- re-usability, templization, repeatability & standardization
- 'Self-service' - make it easy to go fast, while doing the right things and make it hard to do the wrong things

"This is the way" policy enforcement

Build / Secure / Deploy - Path to Production within 1 hour

Meet the needs of the innovation pace while;

- eliminating InfoSec vulnerabilities deployed to production
- increasing resilience
- decreasing costs of re-work and cloud infrastructure

Disney Experiences
TECHNOLOGY & DIGITAL
powering the magic

Harness understanding, current DX state

Current State

- Friction / Bottlenecks** - Preventing Developers from maximum Productivity & Capacity
 - Lack of self-service to on-board & friction from onboarding to "productivity"
 - Best case is "Weeks" to production for new / existing apps
 - Best case is "Months" for new developers to onboard & reach productivity
- Diluted digital capacity** - Unable to maximize guest experience opportunities
 - > 40% developer / "digital assembly line" time in toll / non-innovative work
 - Burdens: Context switching, learning & maturity curves, & cognitive load
- Cumbersome tooling & manual process**
 - from code → production: Best case is "Weeks"
- Competing cultural forces: speed / velocity ↔ security / resilience**
 - Increasing → Complexity of systems across build/test/secure/deploy/resilience
 - Pressure from business to deliver new & enhanced digital capabilities quickly
 - Friction for adoption and operationalization across culture and tech ecosystem
 - Lack of re-usability and awareness across technology org
- Obstacles to Tracking and Improving Developer Ops Efficiency**
 - Lack of "full picture" visibility into developer & nuanced operational workflows
 - Insufficient centralized reporting
 - Friction in measuring and improving processes and procedures.

DX Desired State

- Streamlined consumption - Maximize Dev effectiveness** → digital capacity
 - Full Self-service - rapid & automated onboarding → productivity
 - Best case in "Days-1 hour" to production for new / existing apps
 - Best case is 1 week for new developers to onboard & reach productivity
- Optimized digital capacity** - Captured & realized guest experience opportunities
 - > 80% developer / "digital assembly line" time in toll / non-innovative work
 - Eliminated: Context switching, learning & maturity curves, & cognitive load
- Unified tooling & automatic process orchestration**
 - from code → production: Best case is "1 hour"
- Unified cultural forces: speed, velocity, security, & resilience**
 - Abstraction of complexity of systems across build/test/secure/deploy/resilience
 - time to market w/ high levels of resilience and security
 - time for adoption & operationalization across culture & tech ecosystem
 - re-usability capabilities & repeatability awareness across technology org
- Granular & Actionable metrics supporting Developer Ops Efficiency**
 - "full picture" visibility into developer & nuanced operational workflows
 - Actionable centralized reporting
 - Automated measurement for process and procedure improvement

Future Readiness & Tech Excellence

Technology & Digital: Capacity Effectiveness & Output

Turbocharged & Delightful Guest Experiences

Sustained interest & broad demand

What we are hearing, across Apple

Apple Weekly Strategy Sync - Sales / SE

Attendees: Joe Lang, Harmon Bruno, Eric Calabretta, Luke Herten, Alex Valentini, Chris Stutz

Attachments: Harness - Roadmap to \$10m ARR @ Apple

Apple Strat \$10m Framework

Week: Feb 17, 2025

Attendees: Joe Lang, Harmon Bruno, Eric Calabretta, Luke Herten, Alex Valentini

A Person

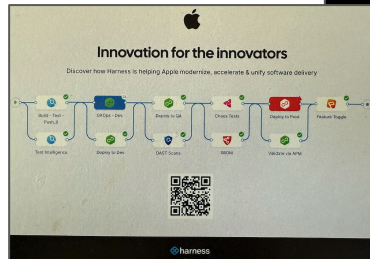

Agenda

Topic	Notes / Content	Actions	Owner
Weekly meeting - Mondays?	Believe that this meeting needs to happen on Mondays, and 11 moves to Friday	Keep on Fridays for now (team move locked in) right planning for a solid launch test week	Joe Lang
Operating rhythm on Sales & SE asks/meets	We need to build champions to run the process. Need data and facts and initial technical confidence to get there	Apple Block around that meeting 30 min before / after	Joe Lang
Review of latest on top 3 active ops	Recourting on the biggest 3 active ops	Pay, R/E, Spinnaker	Joe Lang
Top 3 actions for SE	Discuss / Diagnose / then commit to top actions for team		Eric Calabretta

Apple Services Engineering should enable teams with a unified, outcome-driven software delivery platform to accelerate innovation and reduce friction.

Problem statement:

- Growing Complexity in Software Delivery: End-to-end software delivery involves infrastructure, database, observability systems, and more, each playing critical roles at different stages.
- Fragmented Toolsets: ASE currently supports multiple fragmented systems for software delivery pipelines (Rio, Spinnaker, Carnival, etc.), with several versions of each in use. Apple partner teams often customize these tools (e.g., Jenkins, Rio, Spinnaker), further increasing fragmentation and technical debt.
- Where developers spend their time: Due to the complexity of systems and fragmentation, typical developers are spending at least 40% of their time in tool.
- Slowed Developer Velocity: Fragmentation slows down developers by requiring context switching between multiple tools (often 5-10 or more systems). Friction & toll in the process include:
 - Manual efforts by developers, SREs, release engineers, and other stakeholder

The Modern Software Delivery Platform

Simplify engineering experience w/ the worlds leading AI-augmented software delivery platform

Background on active Harness engagement across Apple

Unified CI/CD, faster than ever

- Unified platform context for CI & CD (no context shifting)
- Leveraging GenAI & ML for testing cycle optimization
- Engineering self-service for CI/CD troubleshooting & release
- Builds run up to 73% faster than Rio
- Full visibility & context into any step within a pipeline
- Reduce or eliminate reliance on SRE teams for deployments
- Automatically detect & recover from deployment failures / anomalies
- + 87% reduction in manual verification/recovery efforts

An invitation to innovate.

What I'm Looking For

I'm seeking an early-stage opportunity in the GenAI space - ideally at the **Seed to early Series B stage** - where I can be among the **first 1-5 enterprise sales ICs** helping shape the GTM motion. I'm drawn to highly technical, complex environments with strong product-market fit focused on **accelerating engineering productivity, infrastructure reliability, or GenAI application development**.

The ideal company has:

- Mission driven strategy and culture which encourages purposeful, depth to drive client value.
- Transformational tech - w. Clear demand signals & early stage product - market fit, w/ inbound interest & technical curiosity from the market. Supporting the foundation to build pipeline through thoughtful outbound go-to-market.
- A product that enables **speed, effectiveness, &/or governance for GenAI engineering teams**.
- Company culture that encourages rapid iteration, fast failure, & nurtures evidence / success based evolution of playbooks.
- *Bonus: adjacency to developer tooling or platform use cases, Harness experience (e.g., CI/CD, IaC, DevOps/SREs), where I can leverage existing relationships (& Harness account intel/Introductions)*

I'm based in **Washoe Valley, NV (Reno / Tahoe)**, & have commuted regularly into **San Francisco / Silicon Valley** for years and strongly believe in the value of **hybrid work** w/ regular & robust in-office / onsite experiences.

I thrive when embedded with sales, product, and support teams - especially in environments where rapid iteration and collaboration drive success.
